

A Student's Guide to Quantitative Methods and Statistical Analysis

A Student's Guide to Quantitative Methods and Statistical Analysis

LEO H. KAHANE

Downloadable Data Sets to Accompany *Regression Basics: A Student's Guide to Quantitative Methods and Statistical Analysis*, Third Edition

The data sets used in the examples in the book and in the end-of-chapter problems are available here. All data sets are “.csv” (comma-separated values). For each .csv data set, there is a corresponding Excel file that contains information about the data set. For example, the file named “nba2021_22.csv” has the full NBA data set used in the book. The file named “nba2021_22_vars.xlsx” contains the variable names, descriptions and the source of the data.
